

PERMATECH  
LIQUID DOSING SYSTEMS

# flowDos

Detergents and dosing systems

# The right combination is what counts.

Fat solvents, stabilised oxygen bleaches, neutralising agents, detergents for delicates and colours, textile finishers, fibre protection and impregnation: As a laundry operator, you know what it takes for all-round perfect fabric care. It is not only the right detergent that makes the difference, but also its exact dosage. All very demanding. Schulthess flowDos makes it easy.

## **Dream team with power**

Our dream team is called flowDos. Team members: Highly efficient flow detergent and exact Permatest dosing systems, precisely matched to the quantity of fabrics, requirements and operation. The only thing that always stays the same: The combination of Schulthess detergents and dosing systems ensures at all times that fabrics are optimally cared for while resources are conserved.

All very professional!

# Flow detergents: perfectly washed.

Flow detergents from Schulthess have been specially developed and produced for professional use. They remove the most stubborn stains, prepare for finishing and at the same time protect the fabrics – even at low temperatures. This is thanks to an advanced formula that combines enzymes, bleaches and powerful surfactants. This increases the lifespan of the fabrics and makes the cleaning processes more resource-efficient.

Flow detergents are used in commercial laundries in hotels, restaurants and other industrial operations. In yours too?

# Permatech dosing systems: perfectly dosed.

## Minimising consumption

As little as possible and as much as necessary: Optimal dosing protects the environment and your wallet. Our dosing systems demonstrably reduce the consumption of detergent, water, waste water and energy – as well as staff costs. Downtime is also kept to a minimum.

## Transporting very small quantities of detergent quickly

A newly developed measuring process enables the precise dosing of very small quantities of detergent with impressive speed. Powerful membrane pumps transport even highly viscous chemicals quickly and precisely.

## Monitoring your machines

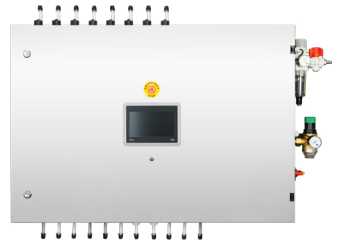

Would you like to monitor your machines and processes in real time from your desk? No problem with our dosing systems. Fully automatic, detailed reporting and continuous process documentation are of course included.

# flowDos: sophisticated solution for professionals.

## **Flow detergents for hygienically clean laundry**

- Dirt has no chance: effective against all types of stains
- Power formula: effective even at low temperatures
- Less is more: powerful with minimal dosing
- Saving resources: gentle on fabrics and the environment

## **Permatech dosing systems for perfectly dosed detergent**

- Small or large laundry: Our dosing systems are customised to your needs – from individual dosing systems to central dosing systems for up to eight machines
- Only as much as necessary: No more wastage of detergent
- Always in view: Reporting in real time
- Rented or bought: You decide which option you'd prefer
- Nurturing and caring: Our qualified specialists carry out maintenance and servicing of the dosing systems

## **Intelligent IoT connectivity for maximum efficiency:**

- Simple integration via an optional router with integrated SIM card
- Automatic replenishment of detergents for the entire service life
- Program status updated live via over-the-air updates
- Full transparency and control via the smartSchuess dashboard – from chemical suppliers to end customers

# Professional advice for sustainable decisions.

When it comes to ecological and efficient washing solutions, no one does it better than us. That's what makes our advice so professional. We show you which appliance is perfect for you and your needs. Just give us a call or send us an email.
